war trauma

As of February 2025, the Russian war has wrecked lives of countless Ukrainians:

42050+

civilian casualties

12650+

killed, including

690+ children

29400+

injured, including

2400+ children

*excluding temporarily occupied territories, the real figures are manifold higher

There are delays in obtaining statistics, there is no data from temporarily occupied regions

3,798

educational institutions damaged or destroyed

2,318

medical facilities damaged or destroyed

Data on the military is unknown.

Sources: UN Human Rights Monitoring Mission in Ukraine, Cabinet of Ministers of Ukraine, Office of the President of Ukraine

According to official data, by the end of 2025, approximately **80,000** patients will need prosthetics of **150,000** limbs. Given that *30% of Ukraine is mined, even more people will have lost limbs by that point. Even if the war ends today, people will continue to lose limbs due to mines. Most patients have multiple and complex amputations, so they need a long rehabilitation period and extensive psychological support

War injuries in Ukraine differ from previously known injuries from the wars in Afghanistan, Iraq, and Vietnam. For example, among American soldiers in the World War II, 64% of injuries were caused by explosives. During the Korean War the percentage of those were 54%, and in Iraq – 68%. Today, according to preliminary data, **about 95% of injuries in Ukraine are mine blast-explosive. About 30%** of the wounded lose their upper limbs. The specificity of war injuries in Ukraine is that they are almost always **combined injuries**.

*According to the Institute for the Study of War - as of April 2025

We are building a country of superhumans!

Those who were injured in war and found the strength to live on are Superhumans. To give them a chance for a decent life, we are developing the Superhumans War Trauma Center. Where military and civilians, adults and children affected by war can receive not only the highest quality medical services free of charge, but also get support up to full reintegration into society and the workplace.

superhumans Center

Superhumans Center Specialization:

- Limb Prosthetics;
- Face and Limb Reconstructive Surgery;
- Physical Rehabilitation;
- Mental Health and Psychosocial Support;
- Hearing Restoration (Surgical Interventions and Prosthetics);
- Social Reintegration;
- Career Counseling.

superhumans Center

A man with prosthetic legs is walking on a treadmill in a gym. He is wearing a black t-shirt with a graphic of an evolutionary sequence from an ape to a modern human, with the word 'superhumans' written below it. He is holding onto the handrails of the treadmill. In the background, another person is visible, also using a treadmill. The gym has large windows and various exercise equipment.

The main mission of the Superhumans Center

- To build high-quality expertise in prosthetics and high-tech medical interventions in Ukraine
- To actively share the experience gained from the world's best specialists
- To treat our heroes at home, close to their families
- To transform Ukraine into a “country of superhumans”, instead of a “country of traumatized people”

Superhumans Lviv - Expertise and Training Center

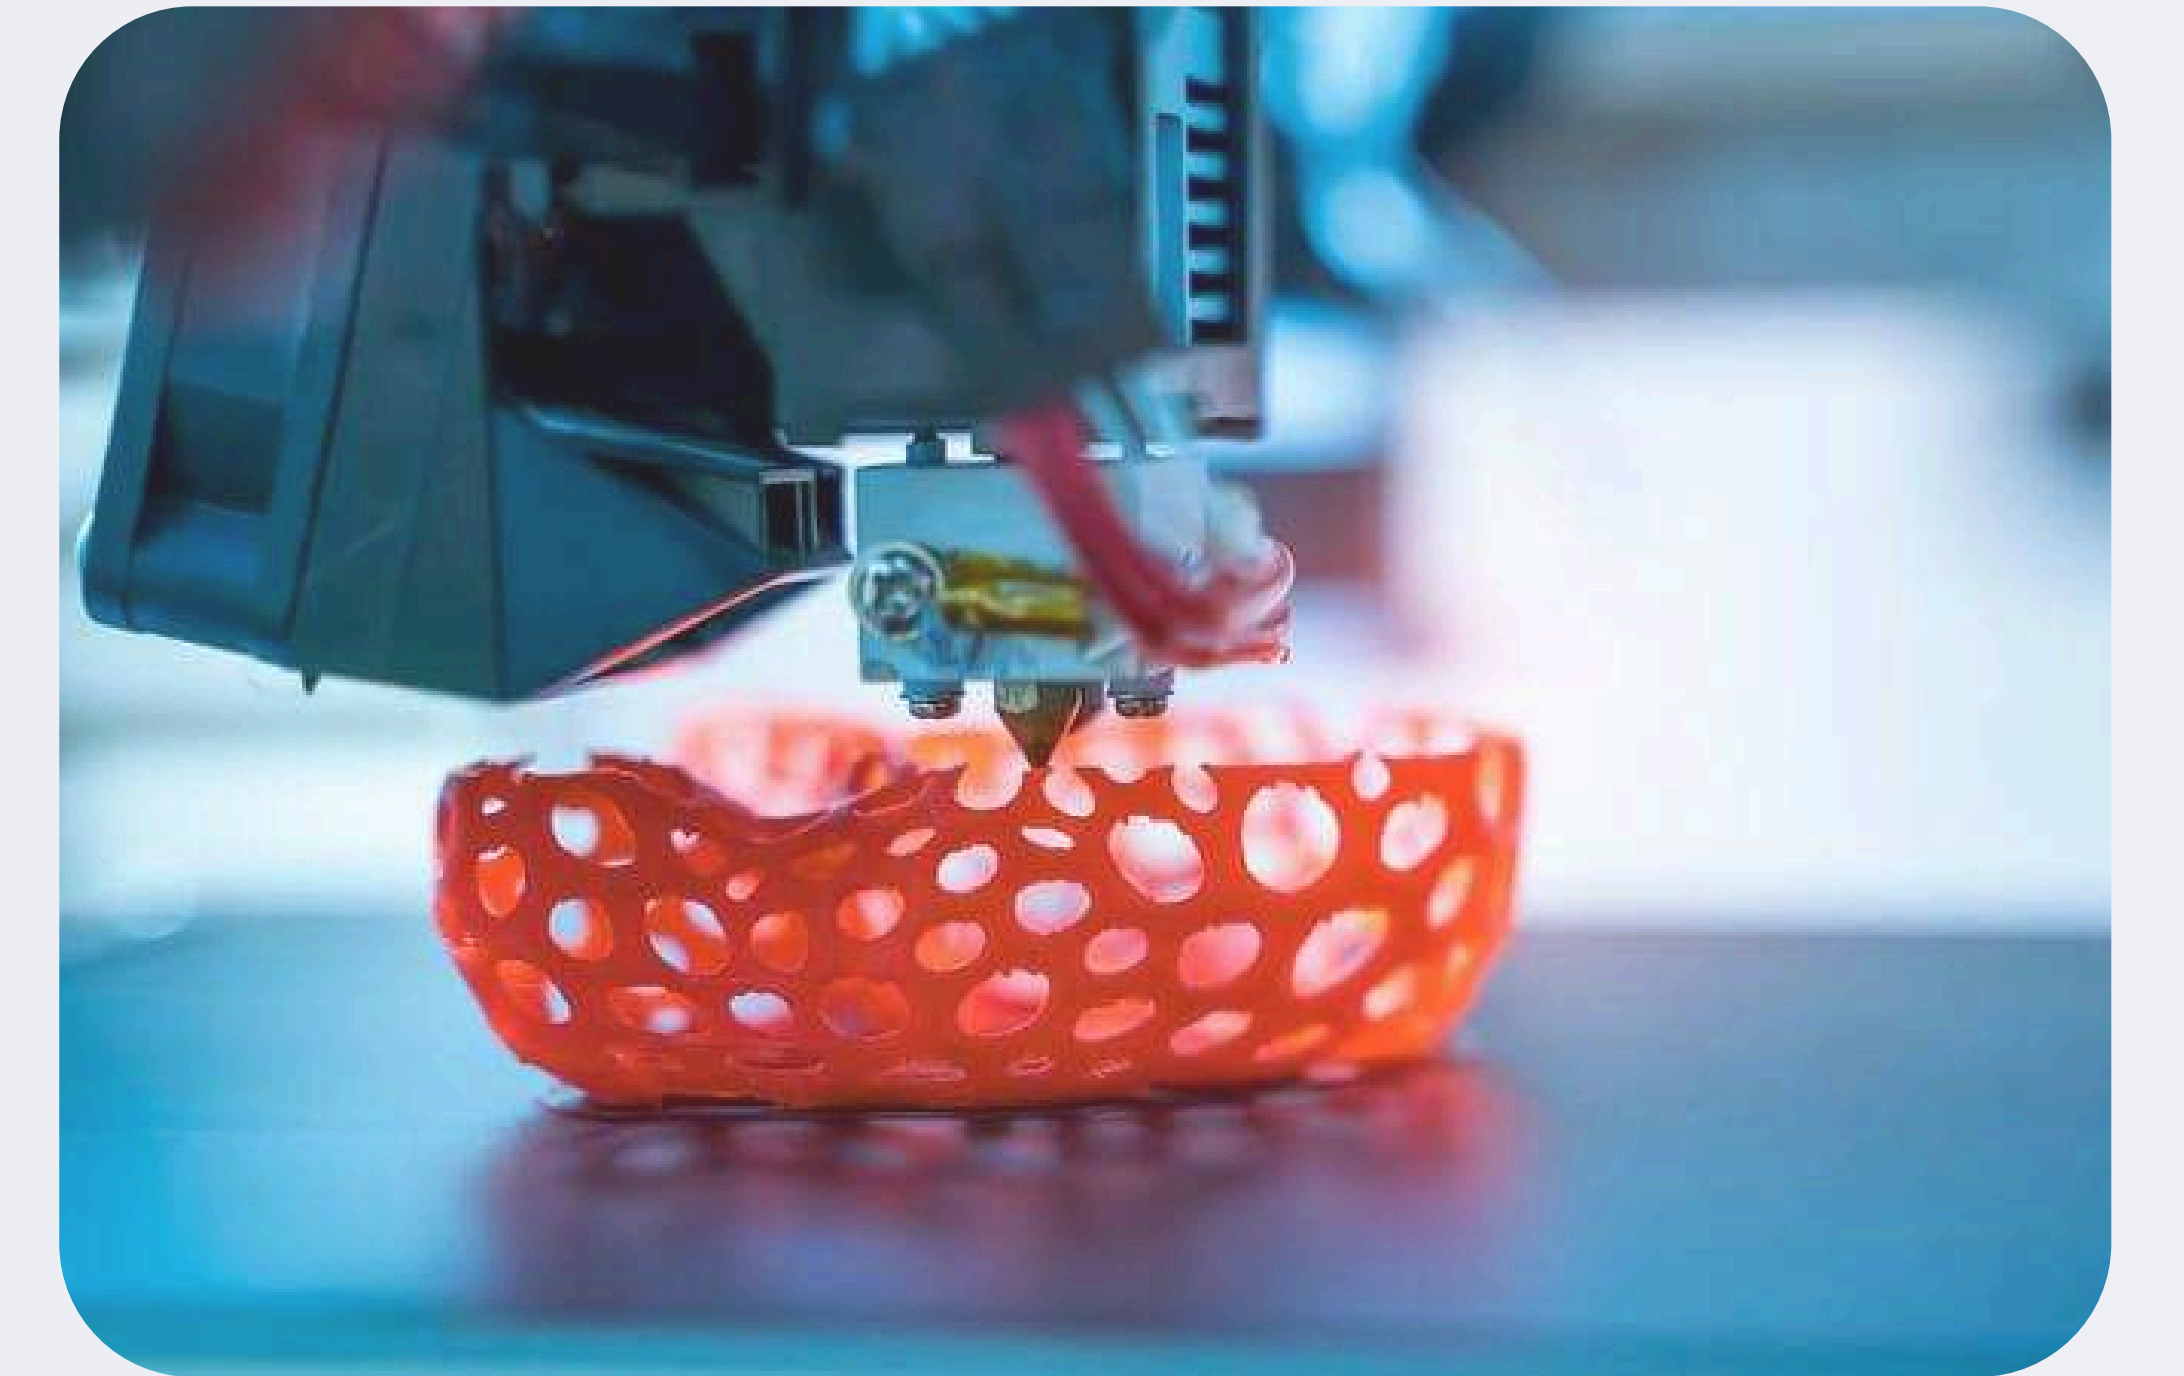

Prosthetics Laboratory
560 m²

**Reconstructive Surgery Department and
86-bed inpatient ward**
570 m², 6 floors

2 Operating rooms
58 m² та 52 m²

3D Printing Laboratory
119 m²

Hearing Restoration Department

Physical Rehabilitation Department
700 m²

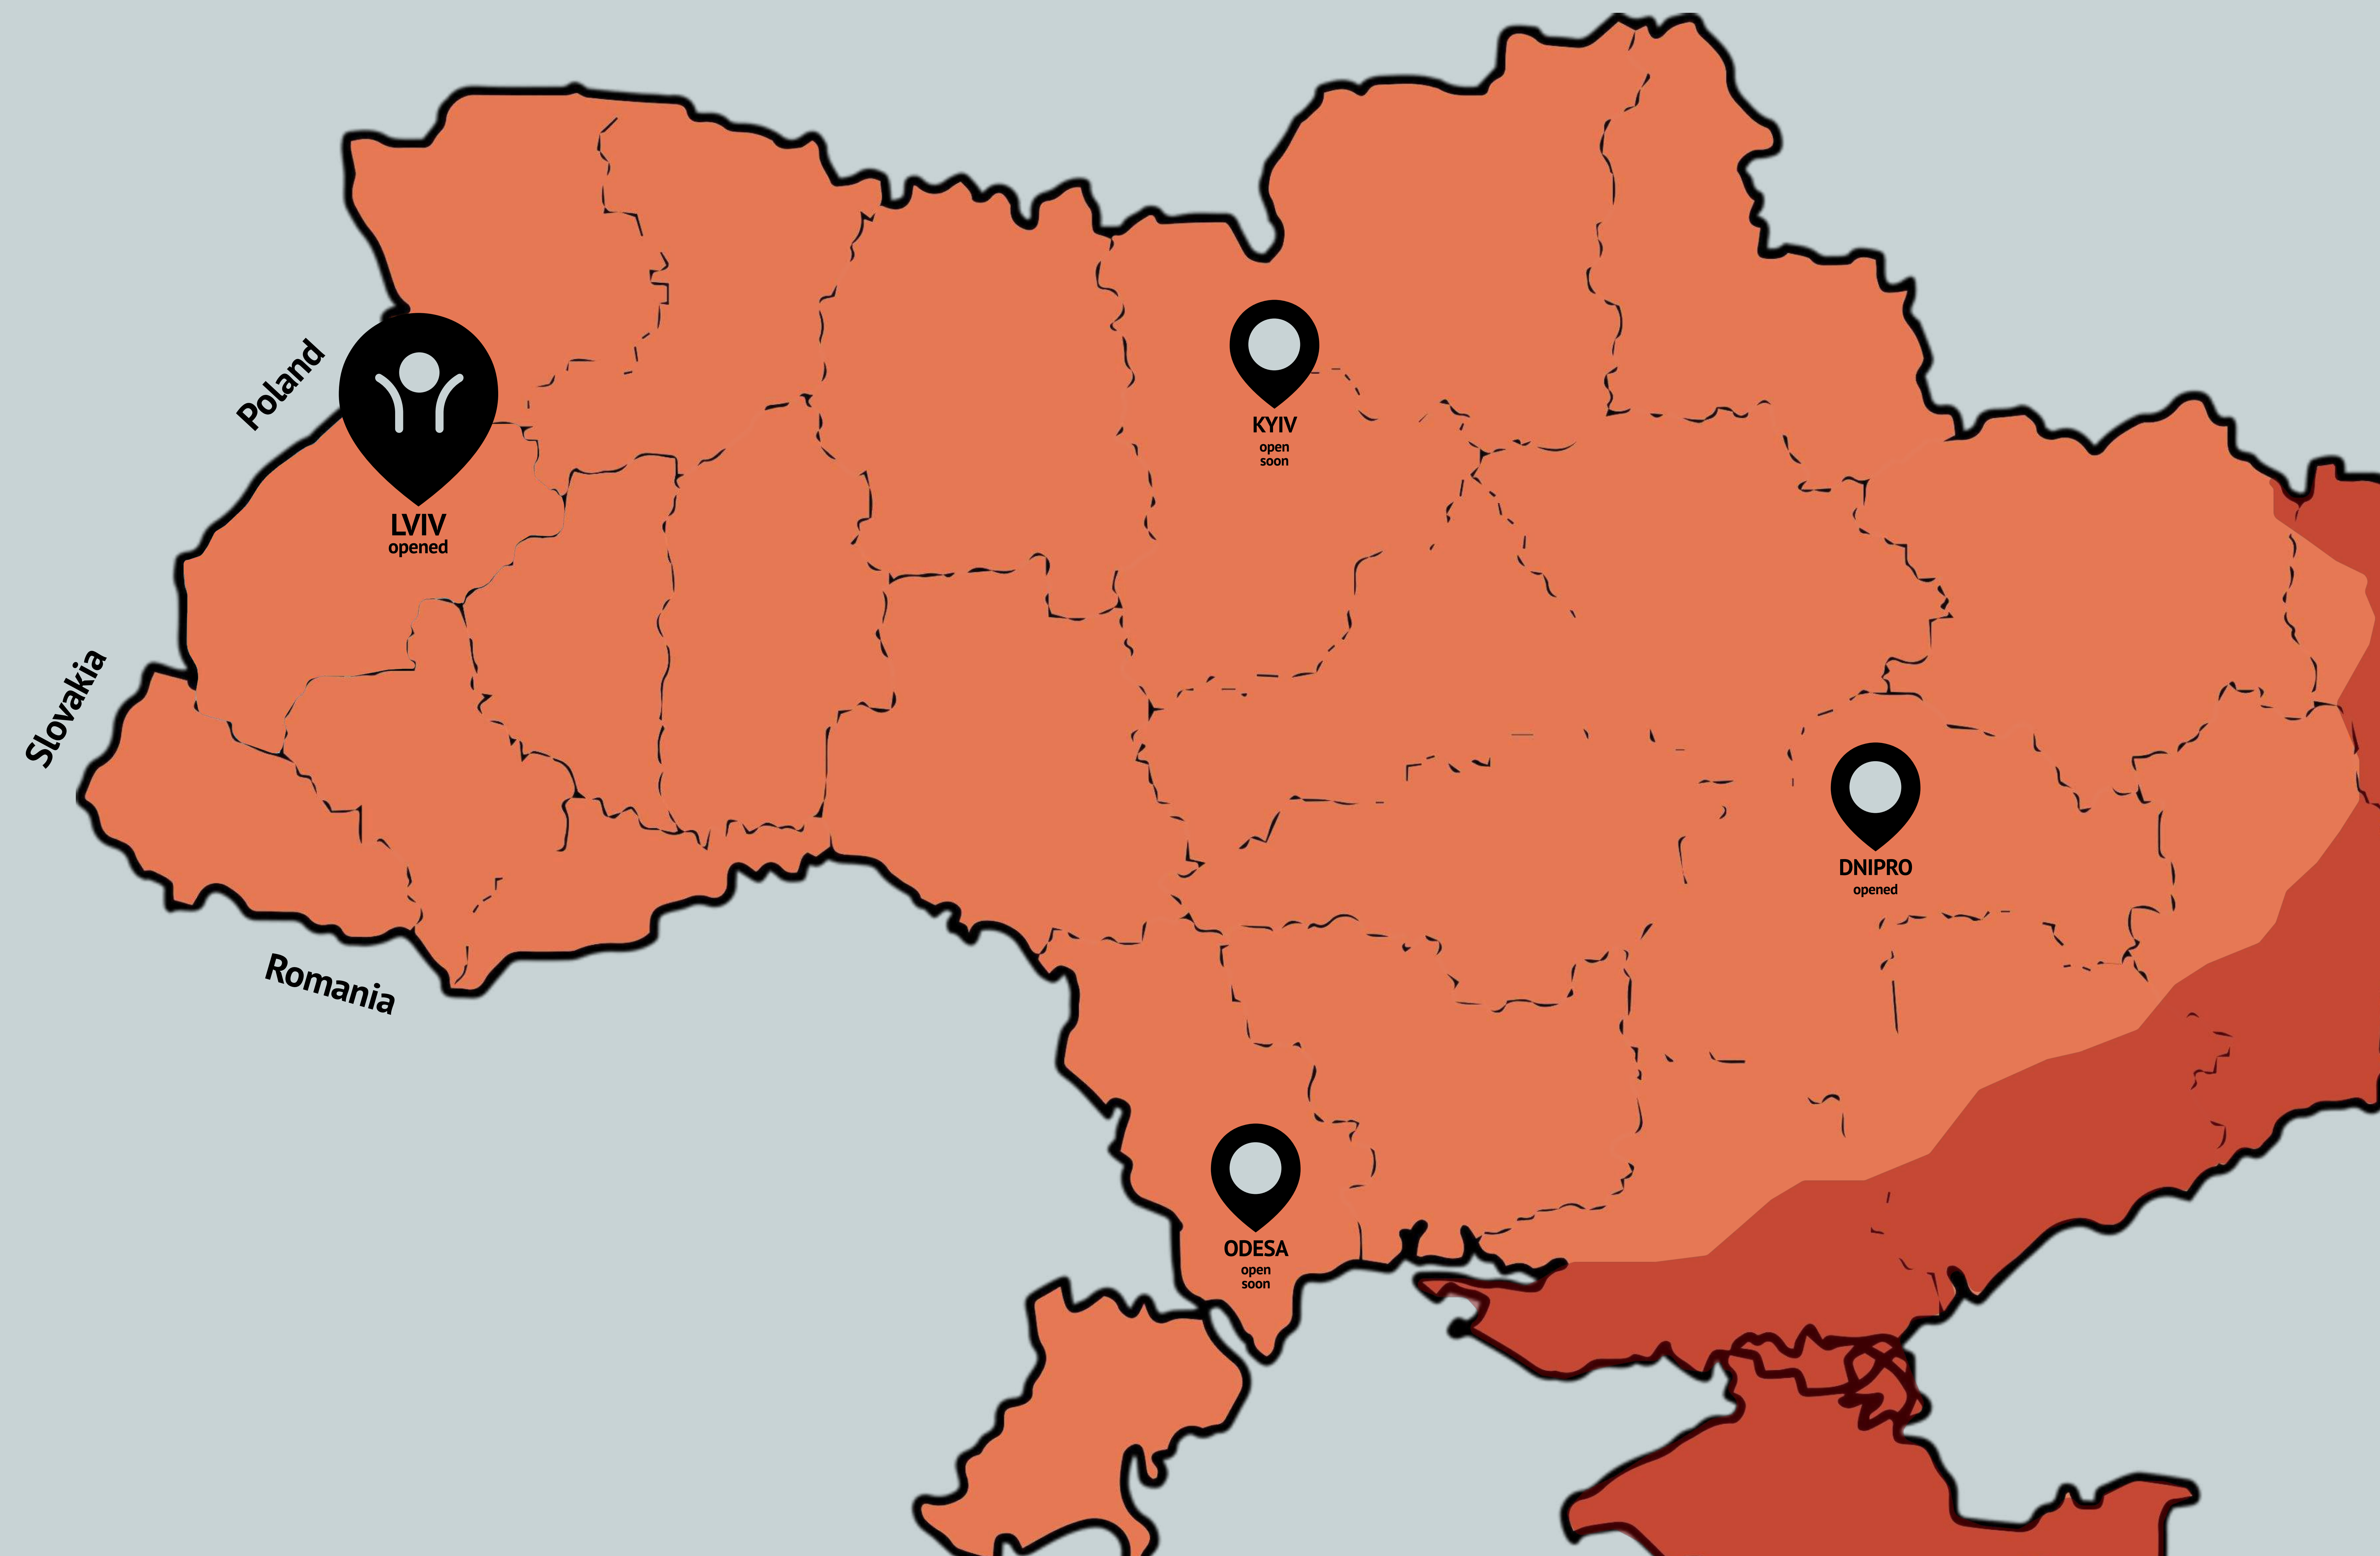

Psychological Support Center

Pool
175 m²

To bring the service closer to the patient, we are opening Superhumans throughout Ukraine

Superhumans Center -

- provides all services for patients absolutely free of charge,
- exists thanks to benefactors and donors*
- is not financed from the state budget

Superhumans has an electronic queue
To become a patient, you need to fill out a questionnaire on the website - www.superhumans.com. Within 3 days of filling out the application, the patient will be contacted by the call center and invited to be examined by a multidisciplinary team.
